

Frontline Excellence made easy.

Problem

Knowledge is still transferred via PDFs and Powerpoints in almost any company. While feasible for office workers, this does not work for frontline teams. **Documents are simply not read**, as they are not optimized for **mobile usage** and **learning in the flow of work**.

Ineffective knowledge transfer to frontline teams causes **low process adherence**, **slow change management** and **quality deviations**.

Solution

Our End-to-End solution allows companies to **seamlessly distribute vital information to their frontline teams** – leading to improved quality of work, smoother operations and higher productivity.

Content Creation

Transferring company specific knowledge (e.g. SOPs) to frontline teams in engaging and effective ways is very hard, because it creates a lot of overhead and manual labor.

Our cutting edge AI Platform **turns any document into highly engaging micro-learning courses** optimized for mobile use, which results in high

engagement, high retention and effective knowledge transfer.

With our technology we are able to **reduce content creation time by 90%** from 6 weeks to 3 days.

Instant Field Support

In addition to gamified training our Frontline App features a **mobile optimized Wiki** combined with a **smart AI Companion**. This allows frontline teams to **chat** with the company knowledge and get instant answers to any questions. This provides efficient and fast support, unblocking them in critical moments.

About Elephant

Elephant was founded in Berlin in 2022. We are supported by strong investors like Flixbus Founders. We are successfully collaborating with 20+ companies in Europe and the US.
